

Report Date: 10 Mar 2015

Summary Report for Individual Task
031-505-3083
Prepare a Strike Warning
Status: Approved

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD5 - This product/publication has been reviewed by the product developers in coordination with the USACBRNS, Foreign disclosure representative and MSCoE foreign disclosure authority. This product is releasable to students from all requesting foreign countries without restrictions.

Condition: Given paper, a pencil, latest Allied Technical Publication (ATP)-45, target analysis data from the fire support element (FSE), and a requirement to warn friendly troops of an impending friendly nuclear attack. This task can be performed in mission-oriented protective posture (MOPP) 4. Some iterations of this task should be performed in MOPP 4.

Standard: Prepare a STRIKWARN message by completing 100% of mandatory fields and the operationally required fields (as necessary) for the message. No change in standard if performed in MOPP 4.

Special Condition: None

Safety Risk: Low

MOPP 4: Sometimes

Task Statements

Cue: None

DANGER

None

WARNING

None

CAUTION

None

Remarks: None

Notes: None

Performance Steps

1. Receive target analysis data from the FSE.

Note:

2. Convert FSE data to STRIKWARN format.

a. Complete Line A (mandatory fill) of the STRIKWARN. Use the FSE nuclear strike number or nickname.

b. Complete Line D (mandatory fill) of the STRIKWARN. Use the FSE Date-time-group (DTG) information.

c. Complete Line F1 (operation dependant) of the STRIKWARN (MSD 1). Add the grid coordinates from the FSE DGZ line. For example: FSE data indicates MSD 1 equals 1,500 meters. For the STRIKWARN, this is translated to read "015."

d. Repeat step 2. c. for STRIKWARN Lines F2 (mandatory fill). Enter DGZ data only once per report; if it was entered on Line F1 then it will not be re-entered on subsequent lines.

e. Complete line H (Operation dependant) for number of surface bursts.

f. Complete line I (operation dependant) for number of burst in a multiple strike.

g. Complete AKNLDG line (mandatory) to indicate whether acknowledgement is required (yes or No).

3. Assign message precedence (from commander guidance).

4. Send message to subordinate units.

(Asterisks indicates a leader performance step.)

Evaluation Guidance: Score the Soldier GO if all performance measures are passed (P). Score the Soldier NO-GO if any performance measure is failed (F). If the Soldier scores NO-GO, show the Soldier what was done wrong and how to do it correctly.

Evaluation Preparation: SETUP: Issue Soldier target analysis data from the FSE, and any supplies needed.

BRIEF SOLDIER: Tell the Soldier that he/she must take information from FSE and prepare a STRIKWARN.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Completed line A (mandatory) by recording the target number or nickname for the strike.			
2. Completed line D (mandatory) by recorded the date-time group of the burst.			
3. Completed lines F1 and F2 based on availability of this information.			
4. Completed line H, if applicable.			
5. Completed line I, if applicable.			
6. Assigned message precedence IAW commander guidance.			
7. Sent message to subordinate units.			

Supporting Reference(s):

Step Number	Reference ID	Reference Name	Required	Primary
	ATP-45 (E) Edition E Version 1	Warning and Reporting and Hazard Predicting of Chemical, Biological, Radiological and Nuclear Incidents (Operators Manual)	Yes	Yes
	FM 3-11.3	Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Contamination Avoidance	No	No

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT. Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects.

Safety: In a training environment, leaders must perform a risk assessment in accordance with ATP 5-19, Risk Management. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, Multiservice Tactics, Techniques, and Procedures for Nuclear, Biological, and Chemical (NBC) Protection, FM 3-11.5, Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Decontamination. Everyone is responsible for safety. A thorough risk assessment must be completed prior to every mission or operation.
